# AirChek XR5000

The SKC AirChek XR5000 sample pumps are design to offer users enhanced battery power and easy operation in a lightweight pump that provides accurate airflows from 5-5000 ml/min (5-500 ml/min requires a low flow adaptor kit). Two battery options are available which provides flexibility and economy for different users and different applications including long run times.

## Key Features:

- Capable of running for up to 40 hours at 2 L/min\*
- Wide flow range from 5 to 5000 ml/min
- 2 interchangeable battery options
- High capacity Li-Ion battery for extended run times
- Patented, highly accurate electronic flow control system
- Automatic temperature compensated flow
- Simple operation with easy to use keypad
- UL Approved for intrinsic safety
- Pump running LED indicator
- Programmable run times
- Extended back pressure capability

\* High capacity 4-cell models only

The AirChek XR5000 is also available in basic pump, dust sampling, vapour/gas sampling and combined dust/vapour sampling kits.

| XR5000 Model*     | 2 L/min | 5 L/min |
|-------------------|---------|---------|
| High-power Li-Ion | 40hrs   | 22hrs   |
| Standard Li-Ion   | 20hrs   | 11hrs   |

\*Using 37mm 0.8µm MCE filters 18hrs 11hrs

| Part Number | Description   |
|-------------|---|
| 210-5001    | AirChek XR5000 Pump with 4 cell Li-Ion battery pack, UL approved and mini screwdriver set with operating manual.<br>Requires SKC approved charger |
| 210-5002    | AirChek XR5000 Pump with 2 cell Li-Ion battery pack, UL approved and mini screwdriver set with operating manual.<br>Requires SKC approved charger |
| 223-241     | Single Charger 100-240 V with multiplug for UK, Europe, USA, Australia, New Zealand   |
| 375-0550    | chek-mate flowmeter, 500-5000 ml/min (recommended)  |
